

## CONTINUED IMPLANT DEVELOPMENT

### Predictable outcomes with novel solutions and applications

This 1 day hands on course includes lectures and a workshop to discuss the use of the angulated and wide body implants (Co-Axis and MAX). The course will also offer bone grafting procedures to support these types of implant placements. Lectures will also include grafting associated with three types of implant placement protocols: Immediate, early and delayed placement. These protocols will include: Implant site development - a novel variation on alveolar site preservation (socket grafting). Simultaneous grafting with early implant placement tricks, tips and materials. Delayed placement protocol of healed sites with moderate to severe bone loss.

#### DATE & TIME

18 November 2017 from 8pm - 5pm

#### VENUE & COST

Venue: CTEC, Entrance 2, Hacket Drive, Crawley, WA  
Cost: \$795.00 p/p excl. GST  
Early Bird: \$695.00 p/p excl. GST before 30 Sept 2017  
7 CPD point

#### PRESENTER

##### Dr Steven Soukoulis

Steven completed his undergraduate training at University of Adelaide in 1996, followed by a two year diploma in clinical dentistry after which he entered specialist training in periodontics, which he completed in 2001. He maintains a specialist Periodontal practice in Adelaide. Steven has served as President of the Australian Society of Periodontology. He is currently with the International Team of Implantology (ITI). Steven has a particular clinical interest in implantology and bone grafting.
