

DENTAL IMPLANT MAINTENANCE COURSE

LTD Mentorship Academy in Partnership with Southern Implants
by Dr Jadwat and Dr Hoosen

PROGRAM

Saturday, 31 May 2025

24 Cardigan Road, Parkwood, Johannesburg, RSA

Arrival and Registrations

08:30 - 09:00

1

Importance of Dental Implant Maintenance

09:00 - 09:45

Overview: Proper maintenance of dental implants is crucial for long-term success. Regular cleaning and professional check-ups are essential to prevent complications like Peri-Implantitis and ensure the longevity of the implant.

Learning Objective: Understand the importance of routine maintenance in preserving dental implants and preventing failures.

2

Understanding Implant Components

09:45 - 10:30

Overview: Familiarise with the various components of a dental implant, including the implant body, abutment and crown. Understanding these parts aids in better maintenance and troubleshooting.

Learning Objective: Identify and describe the function of each component of a dental implant system.

Tea

10:30 - 11:00

3

Patient Education

11:00 - 12:00

Overview: Educate patients on the correct techniques for cleaning and maintaining their implants at home. This includes the use of special brushes, floss and rinses designed for implants.

Learning Objective: Equip patients with the knowledge and tools necessary for effective at-home care of their dental implants.

4

Importance of Maintaining Accurate Records

12:00 - 13:00

Overview: Accurate record-keeping is vital for tracking the progress of implant treatment and for future reference. Proper documentation aids in the early detection of issues and ensures continuity of care.

Learning Objective: Emphasise the necessity of detailed and accurate records in managing dental implant cases.

5 Identifying and Addressing Issues14:00 - 15:00

Overview: Learn to recognise early signs of implant complications such as inflammation, mobility or bone loss. Prompt identification allows for timely intervention.

Learning Objective: Develop the ability to identify potential implant complications and understand the appropriate steps to address them.

6 Treatment Options15:00 - 16:00

Overview: Explore the different treatment options available for addressing complications, including non-surgical and surgical interventions. Understand when to refer to a specialist.

Learning Objective: Gain insight into the various treatment modalities for managing implant complications and when to escalate care.

7 Hands-On Session16:00 - 17:00

8 Final Q&A and Wrap Up17:00

This program is designed to provide comprehensive training for dental professionals involved in implantology, ensuring they are equipped with the knowledge and skills necessary for maintaining high standards of care.
