

Program

DR EBRAHIM FAKIR
MAXILLOFACIAL SURGEON

DR WARREN FARAO
PROSTHODONTIST

MR IZAK VAN DER WALT
DENTAL TECHNICIAN

Welcome to the SIAD Basic Implantology Course, a comprehensive program designed to equip newly qualified dentists with no prior experience in dental implantology, with essential skills and knowledge.

Our goal is to provide you with a solid foundation in implant dentistry, enabling you to confidently identify, diagnose, and treat patients with dental implant needs.

By the end of this course, participants will have gained the expertise to:

- Identify patients suitable for dental implants.
- Diagnose and formulate effective treatment plans.
- Understand the principles of safe and effective implant dentistry.
- Surgically place a single implant in a non-aesthetic zone.
- Communicate crucial information to dental technicians for implant crowns.
- Guide their technicians by using accurate digital and analogue recordings of your dental implants.
- Restore dental implants and understand the different restorative material options.

Join us for an immersive learning experience that will enhance your clinical skills and broaden your professional horizons.
